

JOB DESCRIPTION

Neurology Specialist

Södra Älvsborgs Sjukhus (SÄS), Borås, Sweden

Södra Älvsborgs Sjukhus is one of four hospital groups in Västra Götaland. The hospital hires about 4000 employees with 3 billion SEK of amounted total assets owned by the group. The hospital conducts emergency care in all base specialties and is currently developing its activities through interdisciplinary collaboration.

The clinic offers challenges and works within a wide range of specialties with its regular investment into employees' development of practices and applied methods thus providing good opportunities for staff's professional development. It has good working environment with modern equipment park.

Region Västra Götaland is governed by democratically elected politicians and with over 50,000 employees it is one of Sweden's biggest employers. It is tasked with offering good healthcare and dental care and providing the prerequisites for good public health, interesting cultural life, good environment, jobs, research, education and good transportation. The capital of the region is Göteborg.

Neurology Department

Neurology department receives patients with Parkinson's disease, epilepsy, multiple sclerosis (MS), ALS, primary brain tumours and other neurological diseases. The care is aimed at adults over 18 years. The department has eight care beds divided into single and double rooms. The largest proportion of patients at the department is submitted to the hospital via emergency care reception. The hospital has a planned activity in the department for drug adjustments, investigations requiring inpatient care, post-operative care and rehabilitation, or when there has been deterioration in a basic disease. They work in teams with doctors, nurses, physiotherapist, occupational therapist, curator, speech therapist, dietitian and medical secretary.
