

CAREER OPPORTUNITIES

Leeds Teaching Hospitals Trust (LTHT), Leeds (United Kingdom) has developed **new, high quality and exciting posts** primarily for trainees who have successfully completed their FY2 placements (post MBBS and internship or equivalent) and wish to complete a **Core Surgical Training** equivalent within Surgery and especially **Trauma and Orthopaedics, Plastic Surgery, Neurosurgery and Vascular Surgery**. These posts offer a unique opportunity for applicants to develop their surgical skills alongside experience in other areas such as research and quality/service improvement. Our posts combine education and career development with practical patient-facing care.

The Fellowship has a duration of 24 months and the post holder will work for 6 months in each specialty (in Trauma and Orthopaedics, Plastic Surgery, Neurosurgery and Vascular Surgery). On completion of the training program it is envisaged that the post holder will be ready to complete the certificate of equivalence of Core Training which will allow him/her to apply for the National Specialty Training Programs (STR) of their choice.
