You will also have to work on weekends and there is an on-call roster that is fully negotiable with the hospital and the specialist team. The healthcare provider offers attractive working conditions with a salary of between 76000 and 103000 pounds a year, depending on your experience. They also offer training and reimbursement for these training sessions. It is a challenging job in a modern environment.

Middlesbrough – United Kingdom

Location: Middlesbrough is an industrial city in North East England situated along the North Sea coast to the River Tees in the province of North Yorkshire. Middleborough has approximately 142,000 inhabitants. Middleborough is close to the North Yorkshire Moors and the Yorkshire Dales National Park and the Yorkshire coast. The city has highly rated schools and is well served by a highway network (A1M) and by train. The Lake District is less than two hours away and Leeds Bradford and Newcastle international airports are about an hour away by car. The hospital is a large university hospital. It has about 1000 beds and has a major trauma unit, 3T MRI-scanner, a radiation therapy center and an IVF clinic. It is one of the largest hospitals in England.

1. Consultant in Head and Neck Radiology

Job Description: For a healthcare provider in the UK, we are currently looking for consultant in Head and Neck Radiology for a full-time permanent position. The Radiology department provides a full range of imaging facilities such as 1.5T and 3T MRI-scanners, CT scanners and a fully equipped interventional room. The department is working multidisciplinary with other specialties. There are weekly clinical meetings. Furthermore, you will educate physician assistants and students. There are also research opportunities, which is encouraged by the department. The position is suitable for an enthusiastic radiologist who is motivated to strengthen and further develop the Radiology department. He/she should be flexible and possess excellent communication skills. The position is also interesting for just qualified radiologists. The healthcare provider offers attractive working conditions in a modern environment with the latest facilities. Furthermore, you will be helped with your relocation to Middleborough.

2. Pathologist

Function: For a University hospital in northern England we are looking for a Consultant Pathologist to strengthen the current team. This is in principle a full-time employment but part-time work is negotiable. It is a large hospital with over 1000 beds and has a care area of approximately 1.1 million people. The hospital offers both secondary and third-line care and is part of the Regional Network for Oncological Care. The current team consists of 11 pathologists (including 2 Dutch pathologists) within different sub specialties. Approximately 40,000 preparations are evaluated annually. The Pathology Department has a modern laboratory with all the necessary equipment available (upon request an overview is available). The exact

content of your role is negotiable with the employer. In addition to your clinical work, there is the possibility of setting up your own research line. The employer offers attractive working conditions including the ability to work part-time, compiling the exact completion of your task package, ample opportunities for setting up or engaging in scientific research and extensive reimbursement for further education programs.

3. Anaesthetist

Job Description: For a healthcare provider in the United Kingdom, we are currently looking for an anesthetist for a permanent, full-time job. The anesthesia department consists of 83 consultants, of whom 47 are anesthetists, 18 are intensivists and 8 are cardiothoracic anaesthetists. Furthermore, there are 34 residents trainees in anaesthesia. In this position, in addition to the general tasks as anaesthetist, you will supervise trainees and be actively involved in the management of the department. Involvement in research is encouraged. You will participate in an on call roster of 1:25. The vacancy is suitable for both just qualified anaesthetists and consultants with more experience. He/she must possess a wide range of interests and must want to be part of a dynamic team. He/she must have excellent organization, leadership and communication skills and a flexible, enthusiastic and team-oriented personality. The healthcare provider offers attractive employment conditions in a modern environment with many interesting job opportunities. The salary will be between 76,000 and 103,000 pounds, based on your experience.

4. Neuroradiologist

Job Description: For a healthcare provider in the United Kingdom, we are currently looking for a Neuroradiology's for a full-time, permanent position. The Radiology department has both 1.5T and 3T MRI scanners, CT scanners and intervention rooms. The department works in a multidisciplinary manner with other departments. There are weekly clinical meetings and consultations. You will also give education to registrars and students. Plenty of opportunities will be given to conduct research, which is encouraged by the department. The radiology team consists of 21 radiologists. The position is suitable for an enthusiastic radiologist who is motivated to strengthen the Radiology department. He/She must be flexible and have excellent communication skills. The position is also interesting for newly qualified neuroradiologists. The healthcare provider offers attractive working conditions in a modern environment with the latest facilities. Furthermore, you will be helped with your move to Middleborough. The salary will be between 76,000 and 103,000 pounds based on your experience.
